- Address their specific needs while adhering to their Continuous Professional Development (CPD) plan
- Engage in discussions regarding the current state of global psychiatric care and explore innovative approaches to treating individuals with substance abuse
- Analyze the latest advancements in neuroscience and understand how they can be applied to evidence-based clinical practices in psychiatry
- Examine the role of psychiatry in the prevention of suicide and contribute to discussions on effective strategies in this area
- Review the most recent achievements in clinical and translational research related to mental disorders
- Foster productive discussions and knowledge exchange

among international psychiatrists and researchers to further develop individual expertise

- Discuss recent research findings on early intervention in psychiatric disorders, contributing to a comprehensive understanding of this approach
- Analyze ethical challenges in psychiatry and their impact on patient care
- Integrate knowledge of cultural and social determinants into psychiatric practice

Target Audience

The principal intended recipients of the 24th WPA World Congress of Psychiatry are fully qualified medical specialist doctors with a focus on psychiatry and mental health. This includes psychiatrists, both practicing and academic, at various levels of seniority, including consultants, senior residents, and early-career psychiatrists. Additionally, the event targets professionals involved in psychiatric research, mental health policy-making, and interdisciplinary care, such as neurologists, psychologists, and primary care physicians with a specialization in mental health. The congress is designed to provide these specialists with the latest insights, research findings, and evidence-based practices to enhance their knowledge and skills in the diagnosis, treatment, and management of mental health disorders.
